In the meantime, they are compared with sales of FY2019 for the time being because a YoY comparison seems somewhat improper.

In spite of the rapid resurgence of coronavirus infection throughout the country, there seemed no further limitations for restaurants and shops etc. to suspend their operations. The Central Government and local municipalities have made strong efforts to normalize economic civic activities and support.

In view of this situation, Business sales were 81.6%. While our customers faced some deceleration of their business, we could see such negative impact was limited because of no behavioral limitations from the government.

In the meantime, Household sales ended up 109.7%. Recent record-breaking heatwave much stimulated liquor demand including beer, beverages, RTD (Ready to Drink) and whatever.
